

Propagation of plants at the Elysium Nursery between January and June 2005

Variety	Seeds / Cuttings	Germinated/ repotted	remarks
Aleppo Pine	1550	130	
Almonds (sweet)	80	16	planted field
Ash Tree	30	5	
Basil	765	50	
Bay Lawrel	200	0	
Calendula	250	50	
Carob	389	150	
Caper	110	90	
Chaste Tree	373	30	
Dwarf Palm	80	80	
Evergreen Oak	610	200	
Fig	19	0	
Golden Samphire	548	400	
Judas Tree	820	2	trial
Lentisk	457	0	trial
Maltese Everlasting	292	190	
Maltese Toad Flax	150	140	only two months/ trial
White Poplar	39	4	
Med. Willow big	36	0	
Med. Willow small	18	1	
Myrtle	1693	0	
Olives	100	3	trial
Palm Tree	2	2	
Tamarisk	6959	4,000	
Yellow Poppy	230	0	
Med Buckthorn	105	0	trial
Rosemary	92	18	
Sage	28	8	
Sandarac	320	70	
Sea Daffodil	126	10	
Sea Holly	200	0	trial
Sea Samphire	63	63	
Shrubby Orache	325	10	
Silvery Ragwort	354	150	
Spurge Maltese	35	10	
Tree Spurge	90	0	
Sticky Fleabane	28	0	

Note: a number of trials have been attempted for the propagation of plants, the propagation techniques of which are currently unknown. The foundation is exploring various techniques in the said trials. The great change in the climatic conditions throughout the year have also had a major impact on propagation and the usually designated times for propagation.
